

# CoolBitX Launches Special Edition Binance Chain x CoolWallet S Hardware Wallet

## **Bluetooth-enabled wallet provides on-the-go storage and protection for BUSD, BNB and Binance DEX users**

CoolBitX, an international blockchain security company and creator of the first credit card-sized hardware wallet that allows for bluetooth-enabled smartphone pairing, announces a collaboration with Binance Chain blockchain to launch a special edition of CoolWallet S. Whereby most hardware wallets require USB connections to computers, the Binance Chain x CoolWallet S provides the Binance Chain community with the ability to securely store BUSD, BNB, and integrate with decentralized cryptocurrency exchange Binance DEX, while optimizing for mobility through its bluetooth pairing feature.

“For users who can keep a physical device secure, hardware wallet is one of the safest options to store digital assets, and CoolBitX has optimized the user experience with an elegant CoolWallet card design and bluetooth-enabled pairing feature,” said Changpeng Zhao (CZ), Binance CEO. “I’m excited to see the growth of Binance Chain community, as well as the support from CoolBitX for BNB, BUSD and Binance DEX with the special edition CoolWallet S wallet.”

“Cryptocurrency markets are extremely fast-moving, but oftentimes, cryptocurrency traders need to compromise security for their ability to react to the markets,” adds CoolBitX CEO Michael Ou. “Users of BUSD, BNB, and Binance DEX who may want to trade cryptocurrencies on their phones may do so and still safely store their virtual assets almost immediately without having to wait until they are in front of a computer. The CoolBitX team is very excited to be able to collaborate with Binance and provide a new support channel to their users.”

The special edition Binance Chain x CoolWallet S can be pre-ordered at CoolWallet website between 20 December and 20 January, which includes a 20% discount off the wallet price plus 20 free BUSD.

First released in 2018, CoolWallet S allows users to store and protect multiple digital assets, including BTC, ETH, LTC, XRP, BCH, ZEN, BNB, and ERC20 tokens. The CoolWallet S was recently recognized by Aite Group’s 2019 Digital Wallet Innovation Awards as the winner of the ‘Product Design’ category. CoolBitX continues to innovate and is constantly adding new integrations to CoolWallet S to meeting the demands of the ever-growing digital asset market.

### **About Binance Chain**

Binance Chain is a community-driven blockchain software system with developers and contributors from around the world. Binance DEX is the decentralized exchange feature

developed on top of the Binance Chain blockchain, recognized for setting a new cryptocurrency trading standard for fast and secure peer-to-peer trading. For more information on Binance DEX, visit: <https://www.binance.org/>.

### **About CoolBitX**

CoolBitX Technology Ltd. (CBX) is an international blockchain security company that is building the infrastructure necessary to close the gap between the mainstream market and crypto industry. Founded in 2014 by Michael Ou and backed by SBI Holdings, CoolBitX provides solutions for a rapidly-changing blockchain industry in order to foster the mass adoption of virtual assets through its two product lines: CoolWallet S and Sygna. CoolWallet S is a credit card-sized hardware wallet that allows for Bluetooth-enabled pairing with users' mobile phones. The Sygna line of regulatory compliance products are tailored toward Virtual Asset Service Providers (VASPs), simplifying the process for VASPs to meet the compliance standards of the traditional financial industry and improve the reputation of the virtual currency industry.
